August 8th 2005

Press Release: UIPR080405
Attention: Immediate

DUBLIN, IRELAND – August 8th 2005 – *Upright International*, global provider of access solutions announces its participation on APEX 2005.

STAND 1670

With a space of 180 square meters located in the indoor area of the Maastricht Exhibition Congress Centre *UpRight International* will be displaying its main aerial work platforms and its Aluminum Tower Systems at Apex 2005.

Products to be exhibited:

The TM12

The most compact self propelled lift for all maintenance duties. It can be driven through standard doorways and carried in passenger elevators, yet will lift two people with tools to almost 6 meters working height.

The MX19

An ultra-compact self propelled scissor lift. Extremely small stowed dimensions and the tightest turning radius for greater maneuverability, yet offering working heights to almost 8 metres.

Press info

The X SERIES

Compact heavy duty self propelled scissor lifts; fully specified with roll-out deck extension, hydraulic depression mechanism, non marking tyres and swing out service modules as standard. Highly maneuverable thanks to a very tight turning radius and precise one-hand proportional control.

SL30 Speed Level

Heavy duties lift with large platform areas. The unique Speed Level machine has a 4WD oscillating axles for rough site conditions and can be elevated on sloping or uneven ground. The unique leveling system allows the machine to level 13° side to side and 9° fore and aft.

AB38

Featuring an ultra- tight turning radius, the AB38 Microboom sets new standards in self propelled boom manoeuvrability. Boasting compact dimensions, weight conscious design and proportional controls that are simple and smooth to operate, the AB38 offers users a larger working envelope with its cage rotator and versatile up- and- over articulated/ telescopic lifting mechanism.

Press info

Span 400

Span 400 ladder frame is light-weight, quick and easy to assemble and features the unique Rib-Grip cold formed jointing system. With fewer components to stock or lose the versatile ladder frame tower system can be used to construct simple free standing mobile towers or more complex staging systems with a host of accessories.

The Span 400 ladder frame is only limited by your imagination.
